Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 11 recite the limitation "the front panel". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Orthey in view of Joseph.

Orthey discloses the use of a zither comprising a rigid hollow lightweight, non-organic frame extending around the outer periphery of the instrument, that allows a chromatically tuned instrument to sound similar to one that is diatonically-tuned (column 2, lines 42-50); and readily removable top and bottom panel members (20 and 22) facilitating changes in the instrument's appearance, volume, and sound quality. Orthey also discloses the use of interchangeable chord bars and chord bar retaining assemblies (column 4, lines 1-10).

Orthey does not disclose the use of a device configured to provide sufficient strength and stability to support double strings.

Art Unit: 2837

Joseph discloses the use of a frame configured to provide sufficient strength and stability to support double strings (see paragraph 4).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the panel members as disclosed by Orthey to include the strength of the members as disclosed by Joseph in order to provide greater strength to a string frame.

5. Applicant's arguments with respect to claim 12/11/06 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
